

STRESS-FREE STORM DAMAGE REPAIR: A STEP-BY-STEP GUIDE

Schuur Handy Construction • Serving Minnesota Since 1998 • MN License #20244357

AFTER THE STORM

Step 1 Contact Schuur Handy for a free, no-obligation damage inspection.

Step 2 Inform your insurance company that your house has sustained damage due to a storm. When the adjuster arrives to access the damage, make sure that Schuur Handy is there too. Remember: the adjuster works for the insurance company; we work for you. We will fight to make sure ALL damages are covered.

Step 3 Schuur Handy will work directly with your insurance company throughout the entire process, saving you time and stress.

If you already have an estimate from your insurance company, it's not too late! Schuur Handy will conduct a full inspection and compare our findings with the existing estimate. If further damage is found, we will work with your insurance company to ensure that all additional repairs are covered.

WHAT WE CAN DO

- debris removal
- emergency board-ups
- electrical work, including temporary hook-ups
- roof and shingle replacement
- siding
- windows

- Broad area of expertise
- Insurance claims
- Work permits

Schuur Handy is a family owned and operated, licensed and insured general contractor with more than 10 years experience in storm damage repair. Based in Corcoran, Minnesota, we operate throughout the Twin Cities metro area.

Our goal is to bring your home—and your life—back to normal as quickly and efficiently as possible. Whether you have a few shingles to replace or an extensive remodel to complete, Schuur Handy is the company to call for high quality, long lasting results.

DID YOU KNOW...

You have the right to choose your own contractor

Your insurance company can not require you to get a specific number of estimates

Hail damage and other weather-related claims are considered “acts of God” and will not affect your insurance premiums

You are responsible only for your deductible

It's in your best interest to hire a local contractor. Avoid “storm chasers,” contractors who follow inclement weather to affected areas. They are in and out of town quickly, rather than remaining available for follow-up service and warranty work.
